

# Killamarsh Medical Practice

---

## Statement of Purpose

At Killamarsh Medical Practice, our purpose is to deliver the highest standard of patient-centred care, continually striving to improve our services and working practices to meet the evolving needs of our community.

### **Our Aims and Objectives:**

#### **1. Review and Improve Medical Working Practices and Services Provided**

We are committed to regularly reviewing and enhancing our clinical and administrative practices, including prescribing, disease management, referral processes, and all aspects of service provision and health promotion. Our goal is to ensure we provide the best possible care to every patient.

#### **2. Review Patient Education and Information**

We believe that patients should be empowered to make informed decisions about their health and care. We are dedicated to reviewing and improving the information and education we provide, ensuring patients are fully involved in decisions about their treatment and wellbeing.

#### **3. Improve Access to Clinical and Administrative Information**

We aim to optimise our use of information technology and paper handling systems, ensuring that clinical and administrative information is accessible, accurate, and delivered promptly to both clinicians and patients. This includes improving the flow of both individual patient data and aggregate practice data.

#### **4. Develop Relationships with Trusts, the Health Authority, and the Primary Care Network**

We actively seek to strengthen our partnerships with local Trusts, the Health Authority, and the Primary Care Network. By working collaboratively, we aim to influence and support improvements in both primary and secondary care, ensuring our patients receive the best possible care throughout their healthcare journey.

#### **5. Develop Our Staff and the Wider Primary Care Team**

We recognise and value the vital contributions of our staff and the wider primary care team. We are committed to supporting their ongoing development and involving them fully in the evolution of the practice and the care of our community.

This statement reflects our ongoing commitment to quality, safety, and continuous improvement, ensuring that every patient receives compassionate, effective, and informed care.
